Uninstall the previous software

1. From the file explorer, go to c:/programmes/inwicast et click on the following link :
uninstall.exe (or uninstall00.exe).
2. Open Windows parameters, go to Applications and uninstall the Soft Vision.
3. Restart the studio

Ideally, it would be great at this stage to shut down the studio and remove the Datapath card, the one with the 2 HDMI plugs side by side (but be careful not to mistake it with the NVIDIA graphic card)

Windows Configuration

Open the Windows parameters panel from the Windows menu

Setting

Go to System > Display and apply the following parameters:

Screen

Go to System > Display

Screen #1

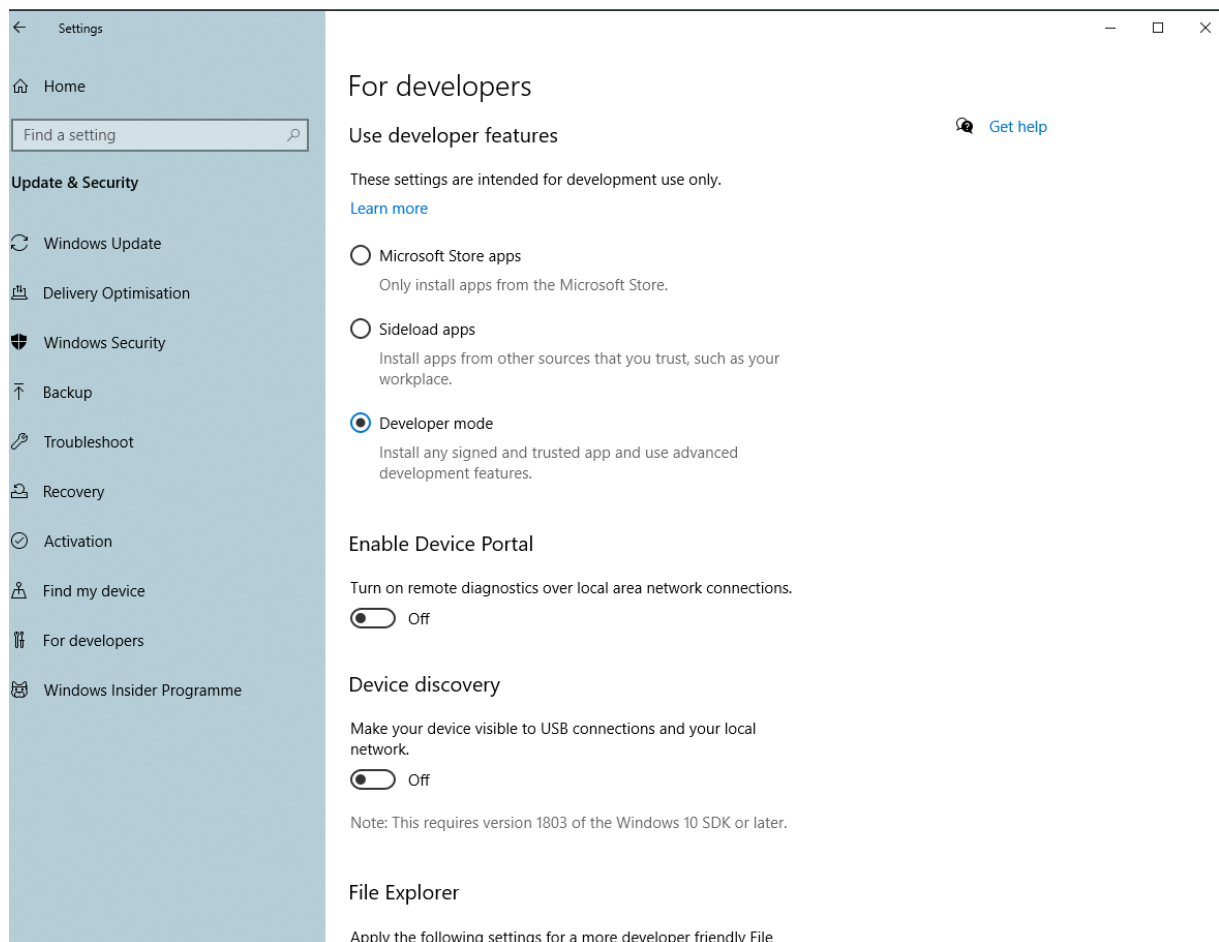

1920x1080 resolution, zoom 100%, Tick the box « Make this my main display »

Screen #2 (on port #4 of the Atem)

1920x1080 resolution, zoom 100%

Enabling the developer mode

Go to update and security > For Developers

Video sources Configuration

Active video sources

The Rapidmooc studio new configuration uses 3 HDMI to USB capture boxes to receive the video sources :

Box	Usage
Blackmagic Design	Video and audio sources for the webmeeting applications and the live streaming (Atem program output)
USB Capture HMDI+	Video and audio sources for the studio recordings (Atem program output)
USB Capture HDMI	Video source for collecting the displayed presentation (Laptop enrtty)

Software Installation

Blackmagic Atem Mini software

8.2.3 version or later

<https://www.blackmagicdesign.com/support/family/atem-live-production-switchers>

Once on the page, go to the column Latest Downloads and download the **Windows version** of **ATEM Switchers 8.2.3 Update dated 10 June 2020**.

The screenshot shows the Blackmagic Design support page for ATEM Live Production Switchers. The top navigation bar includes links for Products, Resellers, Support, Developer, Company, Media, Splice, and Forum. The main content area is titled 'Select a Product Family' and features a grid of product categories. The 'ATEM Live Production Switchers' category is highlighted with a blue border. Below the product grid, there are three columns: 'Latest Downloads', 'Latest Support Notes', and 'Latest News'. In the 'Latest Downloads' column, the 'ATEM Switchers 8.2.3 Update' is listed with a date of '10 Jun 2020'. A blue arrow points to the 'Windows' download button. The 'Latest Support Notes' column shows the 'ATEM Mini Manual' dated '25 Sep 2020'. The 'Latest News' column features two news items from Blackmagic Design, dated '21 Jan 2021'.

Right click and choose « Execute with Powershell » in the contextual menu. Follow the on-screen instructions

Once installed, the Rapidmooc application can be accessed from the Windows menu

Automatic start of the Rapidmooc Application

First you need to get a *.lnk shortcut to the app. This can be done by pinning the app to the Start Menu as a tile and then dragging and dropping the tile to a folder or to the Desktop. This will create a shortcut that can launch the app.

To run the app automatically after boot, you can just put it into the Startup folder: press Win+R and type shell:startup. Everything in this folder is automatically opened after boot. You can just drag and drop your *.lnk file in this folder and reboot to see how it works.
